

AMRC, Sheffield

Project:
AMRC, Sheffield

Contractor:
Henry Boot Construction

Architect:
Bond Bryan

Value:
£800Km

Location:
Sheffield

Client:
Sheffield University

[UKWS Ltd](#) have completed work on a major innovation facility at the University of Sheffield Advanced Manufacturing Research Centre (AMRC). We have worked closely with Main Contractor [Henry Boot Construction](#) on this bespoke facility, comprising a full Euroclad Elite roof and wall specification, service penetrations and a bespoke aluminium perforated screen fence.

This open-access facility will house cutting-edge research programmes aimed at meeting the growing demand for lighter commercial aircraft and supporting the aviation industry's ultimate goal of achieving net-zero carbon emissions by 2050.

Another quality install with attention to detail at the forefront from pre-construction to the construction phase.
